# GLOBAL VIRTUAL EXCHANGE SUMMIT 2025

## Symposium on Bridging Environment, Health, and Sustainable Solutions

8 July 2025 | 14:00 - 16:30 HKT

Keynote Speaker

**Prof. Kelly Fielding**

School of Communication and Arts, The University of Queensland, Australia

**Dialogue for Change: Communicating Climate for Sustainable Behavior**

This talk discusses how understanding the identity of our audiences—who we are communicating with—can help develop effective climate communication and shape more sustainable responses to climate change.

**Prof. Maria Ojala**

Frontiers of Arctic and Global Resilience, University of Oulu, Finland

**Young People and Climate Change: What conflicts do young people experience when trying to live more climate-friendly and how do they cope?**

This talk focuses on what kinds of conflicts young people who want to live more climate-friendly experience, and how they cope and deal with these conflicts and related emotions. What we can learn from this research regarding climate-change education and communication will be elaborated on.

**Prof. Boyi Yang**

School of Public Health, Sun Yat-sen University, China

**Green space and health benefits for Chinese population: Evidence from epidemiological studies**

This talk highlights epidemiological evidence linking urban green space to health benefits in Chinese population.

**Manh-Toan Ho**

Centre for Interdisciplinary Social Research, Phenikaa University, Vietnam

**Navigating a Sustainable Future: From Video Games to Pro-Environmental Behaviour**

This talk explores how green gaming, from educational tools to environmental narratives, can drive environmental engagement and sustainable practices, with insights from player behavior analysis and economic models.
